Technical Skills

Main Skills: HTML, CSS, JavaScript, TypeScript, React, Node.js, React Native, NestJS, Next.js, Vite, Expo, Git, SQL, NoSQL, Scrum, Kanban and other agile methodologies.

Additional Knowledge/Studies: React Query, Docker, Terraform, Kubernetes, C#, Python, Java, Azure Devops, AWS, GCP, RabbitMQ, Redis, Turborepo

Soft Skills

- Proactive and self-taught, organized, and practical.
- Not afraid of challenges.
- Always looking to learn new things and improve my skills.
- Strong team player with great adaptability to changes.

Professional Experience

Hapvida NotreDame Intermédica, Brazil - *Senior Software Engineer*

October 2025 - Current (fulltime)

Currently developing an innovative service marketplace application, built with React Native and Expo, focused on delivering a seamless and intuitive experience for both users and providers.

Key responsibilities and achievements:

- Architecture and implementation of scalable solutions in mobile environments.
- Integration of APIs and backend services to ensure performance and security.
- Development of modern, responsive interfaces with emphasis on usability and accessibility.
- Mentorship and technical support for junior developers on the team.
- Adoption of best practices in development, automated testing, and CI/CD pipelines.

Core competencies:

- Cross-platform mobile development (iOS/Android).
- React Native, Expo, TypeScript, JavaScript.

-
- Integration with payment systems and secure authentication.
 - Product design experience with a strong focus on user experience.

TEN, Brazil - *Senior Fullstack Developer*

October 2025 - February 2026 (contract)

At TEN, a company specializing in virtual assemblies for capital markets, I contributed to the development of robust backend and frontend solutions, ensuring secure and efficient digital governance processes.

Key responsibilities and achievements:

- Designed and implemented APIs to support core business functionalities.
- Developed frontend interfaces to deliver a seamless user experience for participants in virtual assemblies.
- Utilized BullMQ for queue management, ensuring reliable task processing and scalability.
- Built features for file extraction and handling, enabling secure document management and compliance.
- Collaborated closely with product and business teams to align technical solutions with market requirements.

Core competencies:

- Backend development with Node.js and API design.
- Frontend development with React and modern UI frameworks.
- Queue management and distributed processing with BullMQ.
- File extraction, parsing, and secure handling.
- Strong understanding of capital markets governance and digital assembly workflows.

WeFit, Brazil - *Senior Tech Designer*

November 2022 - October 2025 (fulltime)

- Contributed with the implementation of a multi-operator healthcare web portal serving over 2M users, responsible for bug resolution, new feature development, code reviews, and documentation..
- Collaborated with the Architecture & Quality team to define ADRs and process documentation. Actively contributed to the development of an **Internal Developer Platform (IDP)** using **Backstage**, creating templates to accelerate CI/CD pipelines and reduce project setup time by over 90%.
- Built **proofs of concept (PoCs)** to improve processes, including a microfrontend model with module federation and Docker image optimizations that reduced build times by 50% (from 40 minutes to 13 minutes).
- Developed **Backend-for-Frontend (BFFs)** using **NestJS**, applying Clean Code principles. Integrated large-scale insurance portals using **Monorepo** and **Next.js**.
- Implemented automated testing with **Playwright** and **Vitest**.

Academic Education

FIAP, Brazil - *Bachelor's in Software Engineering*

January 2022 - Ongoing (expected completion in 2026)

Unifesp, São Paulo, SP - *Bachelor's in Biomedicine*

January 2007 - December 2010

About Me

I transitioned careers in 2022 (former biomedical scientist). I am a strong team player who values communication, feedback and a growth-oriented work environment.

Although I have more professional experience in frontend development, I am very interested in transitioning to backend or full-stack roles. Therefore, I am looking for career opportunities that allow me to develop these skills.
